

Guidelines for initial submission of papers at ICORT 2023

Prospective authors are invited to submit manuscripts (full-length Articles) containing original contribution with sufficient detail for review. **All submissions must take place through "EDAS Paper Submission Portal for ICORT-23" at <https://icort2023.edas.info>** . The submitted manuscript must include original contribution of the authors which have not been published or submitted elsewhere.

Submitted manuscripts:

- Must be in PDF, two columns and compliant with IEEE conference format
- Should not be below three A4 size pages and not exceed Six A4 size pages in Length
- Articles must be written in English
- Standard IEEE conference templates for LaTeX and Microsoft Word formats should be used to write technical papers and can be downloaded from

<https://www.ieee.org/conferences/publishing/templates.html>

Important note: The reviewing process for ICORT-23 will be double-blind, where the identities of the authors are withheld. In order to effectively implement double-blind reviewing, it is required that no author names and their affiliation should be included in the submitted manuscript (PDF file). Moreover, no direct or indirect reference should be made that could reveal the identity of the authors. Thus, the submission should certainly **NOT** contain the names of the authors, institution names, email ids etc. Also, authors must refer to their own prior work in the third person. Any submissions not meeting these requirements will be rejected without review.
